

Group: Together4Ever
Date: September 27, 2018
Chair: Alexander Solberg
Secretary: Tobias Lindroth
Participants: Viktor Franzén, Tobias Lindroth, Spondon Siddiqui, Alexander Solberg

1 Objectives

Decide who should update RAD?

Discuss the design model.

Update Trello.

Decide how we should hide the message creation from the controllers.

2 Reports

Viktor: Finished the client class and tested it. Finished user tests. Removed .idea file from git.

Alex: Created new tests for Message. Implemented ChatFacade and begun writing tests.

Spondon: Created new login view and created login controller.

Tobias: Improved the design model and learned how to use gitinspector.

3 Discussion items

Who should update RAD?

Discuss the design model and how to improve it.

Discuss how to hide the message creation from the controllers.

4 Outcomes and assignments

We discussed the rad document and have assigned tasks to each person.

We discussed the design model but we will ask our supervisor how we should improve it further.

We decide that the ChatFacade should have several methods for creating text message, image message and so on.

Assignments: Spondon will write section 2.2 in RAD. Will start to connect the controllers and the model

Tobias will write section 3 in RAD. He will also create the SDD document and start looking at it.

Alex will change the structure of the introduction. He will also implement the new methods in the ChatFacade discussed above.

Viktor will learn how to save in a json file

5 Wrap up

Next meeting will be 11:00 01/10 in EG-3508.
