

Group: Together4Ever  
Date: 10/09/2018  
Chair: Tobias Lindroth  
Secretary: Alexander Solberg  
Participants: Alexander Solberg, Spondon Siddiqui, Tobias Lindroth, Viktor Franzén

## 1 Objectives

1. Choose a GUI sketch
2. Discuss a group contract
3. Discuss our current user stories
4. Discuss the domain model (UML)

## 2 Reports

Alex: Written suggestions for user stories, thought about potential GUI designs, and started to plan a server/database relationship.

Spondon: Sketched a GUI, written down user stories.

Tobias: Sketched a GUI suggestion, thought about the design of the domain model, and done some prototyping.

Viktor: Thought about some user stories, started thinking about domain logic, and created some UML diagrams/logic.

## 3 Discussion items

Contract: Ambition level, time and effort, working together/separate

GUI: Discuss our GUI sketches and choose the GUI which seems best

User Stories: Discuss the deadline for writing appropriate user stories

Decide a time where we will sit down and create the domain model

## 4 Outcomes and assignments

Contract: Determined that we will aim for a collective (grade) 5 but believe that a 4 is more reasonable. On top of the 2 mandatory meetings we will spend

time working together depending on required remaining work. A minimum requirement is that we meet 2 hours a week to discuss/work. Additionally we will work within our roles individually.

GUI: We decided on a 2 panel selector for a GUI. Where we can see both the messages and a minor overview of the other conversations. Spondon will design a refined version of the sketch and upload it to GitHub.

User Stories: We will discuss the user stories today. Furthermore we will have a more in-depth analysis and discuss on Wednesday (12/09). We will all think about additional user stories until the next meeting.

Domain Model: We will discuss the domain model on Wednesday (12/09) and plan to have a first version of the model in "UML".

## **5 Wrap up**

Might have to discuss the alternatives to SQL, MySQL, etc. Database server relationship

We will have the next meeting Thursday (13/09) at 12:00 below HC.
