

Group: Together4Ever
Date: October 1, 2018
Chair: Tobias Lindroth
Secretary: Viktor Franzén
Participants: Viktor Franzén, Tobias Lindroth, Spondon Siddiqui, Alex Solberg

1 Objectives

Determine if two channels are allowed to have the same name.

Decide who should do what in the SDD.

Determine when/how are we going to connect the different parts of the code.

Determine the objectives for the current sprint.

2 Reports

Alex: Alex has been sleeping since the last meeting. He has also tested and written javadoc for the facade class.

Spondon: Spondon has written javadoc and begun connecting the controllers and model. He has also written chapter 2.2 in the RAD-Document and uploaded the gui sketches.

Tobias: Tobias has written chapter 3 in the RAD-document. He has also uploaded the design model v.1 to github.

Viktor: Viktor has looked into JSON in java.

3 Discussion items

Discuss if two channels are allowed to have the same name.

Discuss who should do what in the SDD.

Discuss if we will sit together and connect the different parts of the code and how we will connect them.

Discuss new tasks for the trello sprint.

4 Outcomes and assignments

We have determined that two channels can't have the same name, but the model still supports creating channels with the same name so it is possible for us to change our minds later.

We have decided that we are going to connect the application together this Wednesday at 10.00.

We have delegated new tasks in trello.

Assignments:

Viktor: Viktor will write the introduction for the SDD. He will also write chapter 4. Tobias: Tobias will write chapter 2 in the SDD. He will also change the channel class to implement changes discussed above.

Alex: Alex will write chapter 2 in the SDD. He will also edit the facade to implement the changes discussed above.

Spondon: Spondon will write chapter 2 in the SDD.

5 Wrap up

The next meeting will be held this thursday the 4/10 at 12.00 in EG-5209.
